

Lake Informational Sheet

Lake Mary Jess

Lake Location Data^{1,4}

Latitude: 28° 28' 34" N **Longitude:** 81° 22' 39" W
Northing: 1,506,048 **Easting:** 534,832
STR: 23-23-29
Major Drainage Basin: Boggy Creek Drainage Basin
Water Management District: SJRWMD
Commissioner District: 3
Maintenance District: John Young

General Information^{2,3,5,6,7}

Contributing Area (ac): 244.6
NHWE (ft NAVD): 92.45 **Surface Area @NHWE (ac):** N/A
Datum Conversion (ft): -1.047
Datum Conversion Source: Orange County Surveyed Benchmark: S1131002
Receiving Water Body: Lake Jessamine
NHWE Report Available: No
Flowpath: Lake flows west through pipe/channel system going to Lake Jessamine.

Correlation of Associated Data IDs^{8,9,10}

Lake Index ID: 316
EPD Lake ID: BC20
Major Basin Model Node: MARY
Alias: N/A

Lake Informational Sheet

Lake Mary Jess

General Notes:

1. Inclusion of lakes in the Lake Informational Sheets does not imply ownership by Orange County.
2. All elevations are referenced to the North American Vertical Datum of 1988 (NAVD 88) unless otherwise noted.
3. Local datum conversion factors represent conversion from NGVD 29 to NAVD 88. Local conversion factors are County-established and are based on conversion factors for local County benchmarks, as recorded by Orange County Survey Department. Where benchmark conversions are not available, datum conversion factors were obtained from NOAA VertCon or USACE Corpscon based on the centroid of each lake. Note that the Local Datum Conversion Factor may differ from that used in FEMA FIS Reports and FIRM Maps.
4. Lake Location Data is based on the centroid of the subject lake.
5. "Contributing Area" is based on existing drainage basin delineations from major drainage basin master stormwater models and small area studies provided by the County.
6. "Surface Area at NHWE" was determined using Orange County terrain data where available. Where "N/A" is indicated, terrain data was not available at the NHWE or appeared suspect.
7. "Receiving Water Body" and "Flowpath" are estimated based on available lake outfall, aerial, and terrain data.
8. "Lake Index ID" is the ID associated with the County's Lake Index feature class (Feature class field: LINKFIELD).
9. "EPD ID" designates nomenclature used by the Orange County Environmental Protection Division.
10. "Major Basin Model Node" refers to the Node ID of the associated lake in the watershed master plan stormwater model.
11. Land Use designations were assigned by St. Johns River Water Management District (SJRWMD, 2014) and South Florida Water Management District (SFWMD, 2014-2016). The Landuse Distribution chart includes the lake feature in the water percentage shown.
12. When FEMA elevations were not provided (i.e. Zone X and Zone A), County or SJRWMD Established 1% Chance Flood Elevations were listed, if available. FEMA Datum Conversion is based off the September 24, 2021 Orange County FIS Report for the given watershed, and represent conversion from NGVD 29 to NAVD 88.
13. Floodplains shown are based on the FEMA National Flood Hazard Layer for Orange County, Florida, current as of August 31, 2022.
14. Flood zone designations and base flood elevations may be established or revised when new and more accurate information becomes available. Several factors influence the frequency with which flood maps may be updated, such as the extent of new development and the completion of flood-control projects.
15. Lake Outfall Data is based on existing information obtained from Orange County infrastructure databases, Southeastern Survey and Mapping Corp. (SSMC) survey data, model input data, and/or aerial and terrain data.
16. "Major Basin Model Link" refers to the Link ID of the associated outfall in the watershed master plan stormwater model.
17. Aerial images were obtained from FDOT (dates range from 2020-2021).

Notes Related to Lake Stage Graphs:

1. "Lake Stage Data Not Available" indicates that the lake stage is not monitored by Orange County.
2. Rainfall data is from Orange County Lake Conway rainfall gage and supplemented with data from the NOAA rainfall gage at Orlando International Airport where necessary.
3. Average Monthly Rainfall is the historical average of the total monthly rainfall as recorded by the NOAA Orlando International Airport rainfall gage.
4. Lake stage data is from SFWMD and Orange County.
5. Average Annual Lake Stage is the average of periodically recorded stages within a given year.
6. High-Low bars indicate the maximum and minimum stage recorded within a given year.
7. Recorded Stages indicate the measured stage at a given time and may not represent the actual trend between measurements.
8. Historical Average Stage is based on the arithmetic average of past stage data provided by the County from the period of record for each lake. (1960 - 2022)
9. Historical Maximum Stage is the highest recorded stage within the lake, based on recorded lake stages provided by the County.
10. Historical Lake Levels graphs include stage and rainfall data through July 31, 2022, where available. Monthly data includes data from January 1, 2020 through December 31, 2021, where available.
