

Lake Jessamine Baffle Box Project

Background: OCEPD and the Lake Jessamine Advisory Board decided to install three baffle boxes on the north side of the lake to improve water quality.

Project Status : Complete

Commission District: 3

Project Details

Drainage Basin: Boggy Creek Watershed

BMP Type: Nutrient Separating Baffle Box

Targeted Pollutant(s): Total Nitrogen, Total Phosphorus, and Total Suspended Solids

Lat/Long: 28.491439 / -81.381668

Project Goals

- Reduce the nutrient loadings to Lake Jessamine
- Treat stormwater runoff from northern neighborhoods that discharge directly into the lake
